

ATIDIUM

Atidium is a Payments & Budget Management Decentralized App, Leveraging the Blockchain, Cryptocurrency and AI Technologies.

Atidium Technologies and Main Features

ATD Cryptocurrency

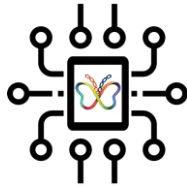

This is the Atidium token.

The token can be used all over the world as a source of payment, and the app will convert it to the local fiat currency in real time. The value of ATD can be locked in at any given moment through the ATD Cash token on the app. Securing the token's value will help avoid market volatility.

Savings, Staking & Leasing

In the future we will use the benefits of EOS blockchain, such as, Leasing and staking for rewards. There will be a special savings feature that will automatically assist you to enjoy the EOS blockchain benefits

The First Crypto AI Virtual Budget Advisor

At the touch of a button, the app will learn and advise the user how to manage and improve their day-to-day financial behavior. The AI Budget Management Advisor can be configured with Push Notifications to give the user real-time tips and alerts.

Atidium Debit Card

It's international and can be used to make online and physical purchases. It can also be used in regular ATMs all over the world. Your debit card will sync with the Atidium app in real-time and will convert ATD to the local fiat currency.

The First Shared Digital Wallet

Users will have the ability to create a shared digital wallet. The wallet will have different options for multiple user use. Friends, family members and co-workers now can have a customizable wallet to track spending and savings.

NFC Payments

The Atidium app will use the NFC protocol (near-field communication) to pay in millions of cashiers around the world.

Our Target Audience

The Private Sector

We are here for those who want to get 100% control of their finances. This will reduce the need for people to rely on banks and credit card companies. The app is easy to use and will give people the ability to manage their budget more wisely. We're sure our app will be adopted by a lot of crypto investors and pioneers.

The Business Sector

Using Atidium as a method of payment and expense tracking is the perfect solution for businesses and local or international organizations. The tokens have the ability to be set to certain conditions according to your business's needs, such as expiration date and monetary value. This helps plan and track the spending and budget of the business or organization in real time.
